Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-24, drawn to a clamping device with a support member, classified in class 269.
 - II. Claims 22, 25 and 26, drawn to a clamping device with a reversing slip clutch, classified in class 74.
 - III. Claims 22, 27 and 28, drawn to a clamping device with a specific clamping arm configuration, classified in class 30, subclass 374.
2. Claims 22-28 have been restricted such that the patentability of the invention is presumed to lie in the details of the particular group (e.g. the support member of Group I). It is noted that if claim 22 as originally filed is part of an elected group and determined to be patentable, rejoinder of claims 22-28 will be considered. It is further noted that claim 22 is listed as part of groups I-III but is not considered to be part any of these groups. Rather, claim 22 recites subject matter that is common to all of the groups and has been shown as part of each group for clarity (i.e., so that it is clear which claims are part of which group). Further, because claim 22 includes subject matter that is common to all of the groups, it is not considered to be independent or distinct from any of the groups. Therefore, claim 22 will be examined upon election of one of the groups.

Art Unit: 3724

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions of groups I and II are separate inventions, specifically subcombinations disclosed as useable together. They are distinct because the invention of group I does not require the reversing slip clutch of group II for patentability as evidenced by the omission thereof from group I, and the invention of group II does not require the support member of group I for patentability as evidenced by the omission thereof from group II.

5. Inventions of groups I and III are separate inventions, specifically subcombinations disclosed as useable together. They are distinct because the invention of group I does not require the specific details of the clamping arm (e.g., the metal weight) of group III for patentability as evidenced by the omission thereof from group I, and the invention of group III does not require the support member of group I for patentability as evidenced by the omission thereof from group III.

6. Inventions of groups II and III are separate inventions, specifically subcombinations disclosed as useable together. They are distinct because the invention of group II does not require the specific details of the clamping arm (e.g., the metal weight) of group III for patentability as evidenced by the omission thereof from group II, and the invention of group III does not require the reversing slip clutch of group II for patentability as evidenced by the omission thereof from group III.

Art Unit: 3724

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

**Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01**

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
